HIPAA Security Risk Assessment Tool

Last Completed 4/9/2026

Next Due Date 4/9/2027

Sponsored by the Office of the National Coordinator for Health Information Technology (ONC), in collaboration with the HHS Office for Civil Rights (OCR).

Background

The [Health Insurance Portability and Accountability Act \(HIPAA\) Security Rule](#) requires that covered entities and its business associates conduct a risk assessment of their healthcare organization. The Office of the National Coordinator for Health Information Technology (ONC), in collaboration with the HHS Office for Civil Rights (OCR), developed a downloadable Security Risk Assessment (SRA) Tool to help guide healthcare providers conduct a security risk assessment as required by the HIPAA Security Rule. We have used this tool to conduct a risk assessment.

The screenshot shows the HealthIT.gov website. The browser address bar displays "healthit.gov/topic/privacy-security-and-hipaa/security-risk-assessment-tool". The page header includes the ASTP logo (Assistant Secretary for Technology Policy) and navigation links for TOPICS, BLOG, NEWS, DATA, and ABOUT ASTP/ONC. The breadcrumb trail reads: HealthIT.gov > Topics > Privacy, Security, and HIPAA > Security Risk Assessment Tool.

Security Risk Assessment Tool

The Health Insurance Portability and Accountability Act (HIPAA) Security Rule requires that covered entities and its business associates conduct a risk assessment of their healthcare organization. A risk assessment helps your organization ensure it is compliant with HIPAA's administrative, physical, and technical safeguards. A risk assessment also helps reveal areas where your organization's protected health information (PHI) could be at risk. To learn more about the assessment process and how it benefits your organization, visit the [Office for Civil Rights' official guidance](#).

What is the Security Risk Assessment Tool (SRA Tool)?

The Office of the National Coordinator for Health Information Technology (ONC), in collaboration with the HHS Office for Civil Rights (OCR), developed a downloadable Security Risk Assessment (SRA) Tool to help guide you through the process. The tool is designed to help healthcare providers conduct a security risk assessment as required by the HIPAA Security Rule. The target audience of this tool is medium and small providers; thus, use of this tool may not be appropriate for larger organizations.

SRA Tool for Windows

The SRA Tool is a desktop application that walks users through the security risk assessment process using a simple, wizard-based approach. Users are guided through multiple-choice questions, threat and vulnerability assessments, and asset and vendor management. References and additional guidance are given along the way. Reports are available to save and print after the assessment is completed.

This application can be installed on computers running 64-bit versions of Microsoft Windows 7/8/10/11. All information entered into the tool is stored locally on the user's computer. HHS does not collect, view, store, or transmit any information entered into the SRA Tool.

Need Help?

Please leave any questions, comments, or feedback about the SRA Tool using our [Health IT Feedback Form](#). This includes any trouble in using the tool or problems/bugs with the application itself. Also, please feel free to leave any suggestions on how we could improve the tool in the future.

You may also leave a message with our Help Desk by contacting [734-302-4717](tel:734-302-4717) or sending email to SRAHelpDesk@Altarum.org.
